## BoCan as

As designers and engineers with 30 years on the market, we can help you make plastic buckets.

We take an overall look at your needs as packaging manufacturer, and apply our long time experience from many markets to **tailor make** your products and operations to match your customers requirements.

**What we can offer to you** is a license to utilize our component designs and our services as consulting engineers. We can also supply the mould designs and production know-how, including supervision of the acquisition of suitable production machinery and installations, we can train your staff and setters as well as advice on the start up of an adequate production facility with good production flow that will minimize your production costs.
